

RESPONSES TO QUESTIONS AND COMMENTS RECEIVED FOR
Solicitation Number NND1038418680

1. What type of cab will this unit require? 1 or 2 man cab?

The cab configuration is not that critical, single cab is fine.

2. Does this unit require a hose reel on the side of the unit? If so what GPM will it be rated for?

There must be a hose reel to fuel smaller aircraft and needs to be rated for 300gpm.

3. Your description of the unit specifically is a Garsite 10,000 gallon refueler model number 10M-800-SCFL. There is no equal to a specific model number made by a specific company.

Though we have listed "Garsite...BRAND NAME OR EQUAL", we have identified the salient characteristics of the fuel tanker that must be present to be considered equal. Our market research indicates that there is more than one brand name that can meet these salient characteristics.
